Wood Handle Toothbrush-Style Cleaning Brush

An especially popular welder's tool, but very suitable for a variety of cleaning applications. Bent wood handle, approx. 7 3/4" long, with 3 x 7 bristle rows. Stainless steel bristles (laced for reinforcement in the SW version) are great for heavy-duty tasks, while brass and nylon provide less abrasive cleaning.

S for stainless steel, SW for laced stainless steel, B for brass, or N for nylon.

Power-Driven Carbon or Stainless Steel Tube Brushes

Double-stem, double-spiral tube brushes are for the tougher cleaning and deburring jobs that manual brushes cannot handle. Handles are heavy-duty 4-wire construction which will readily chuck into a power tool. More bristles give this brush a longer lifespan. Choose a larger diameter fill wire for stiffer cleaning action.

Brush should be firmly chucked into a suitable holder at all times. Always wear eye protection and follow safety guidelines supplied with brushes. Do not exceed 2,000 rpm maximum safe free speed!

Power-Driven Tube Brushes

1500

Power-Driven Steel or Stainless Steel Side Action Brushes

Side action tube brushes have a solid concentration of .005" bristles to clean the inner walls of tubes and cylinders with almost no flexing during operation. These brushes are especially effective in cleaning threaded holes or where cylinder side cleaning is needed all the way to the end of a blind hole. The twisted stem is stainless steel.

Stem should be firmly chucked into a suitable holder at all times. Always wear eye protection and follow safety guidelines supplied with brushes. Do not exceed 2,000 rpm maximum safe free speed!

Power-Driven Silicon Carbide Abrasives

Ideal for most polishing and burr removal jobs. Twisted wire handle is of double stem, single spiral construction. Oversize brush diameters can be tolerated with this design because even the sides of the silicon-filled bristles are abrasive. Note optional grits in certain sizes.

Shank should be firmly chucked into a suitable holder at all times. Always wear eye protection and follow safety guidelines supplied with brushes. Do not exceed 2,000 rpm maximum safe free speed!

Small Diameter Wire Wheels with Copper Centers, Stainless Steel or Carbon Steel Fill

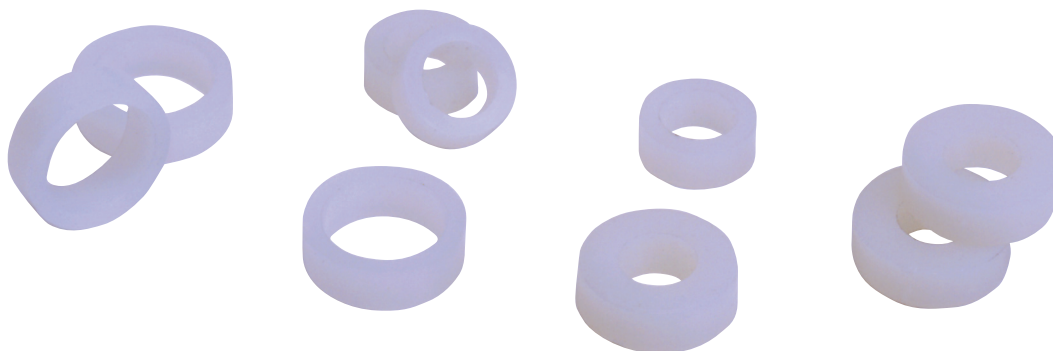

The perfect brushing tools for cleaning, deburring, finishing, or roughening hard-to-reach places that larger diameter wheels can't touch. Also good for stripping insulation from wire. Wires are securely held by copper centers.

Maximum safe free speed is 13,000 RPM for all sizes. Specify desired arbor hole diameter. One adapter furnished free with each wheel brush.
